BIOGRAPHY

For 25 years, I've been in the room with people navigating the hardest parts of the human experience — facilitating, processing, and holding space for transformation that most environments aren't built to handle. I've worked with people at the edge of themselves, helping navigate what many never allow themselves to feel. Over the past four years, I have integrated plant medicine and Ayahuasca with great success.

That work eventually became something larger than any one session or conversation could hold. It became **Soul Journey Experience** — a structured, complete process built around preparation, deep work, and integration. It is designed for people who are done circling the same problems and ready to actually move through them.

I don't lead with credentials. I lead with experience and years of proof that real transformation isn't a weekend event — it's a process, and it has to be held by someone who has actually walked it themselves. This isn't a highlight reel. It's the real work — mine, and the work of the people I've had the honor of walking beside.

PERSONALITY EXPECTATIONS OF SANI

- **Deeply Authentic & Unfiltered:** Sani does not speak in rehearsed soundbites or spiritual clichés. Conversations are raw, honest, and grounded in real lived experience.
- **Direct & Compassionate Presence:** Expect a blend of fierce loving truth and profound holding space. He cuts straight to the core of patterns without bypassing the human struggle.
- **Spontaneous Flow Over Scripting:** While sample questions are available, Sani thrives on organic, in-the-moment dialogue that follows the energetic flow of the host and audience.
- **Grounded Wisdom:** Bridging ancient Plant Medicine traditions and 3D realities into practical, actionable insights for modern listeners.

WHAT YOUR AUDIENCE WILL GAIN

Listeners will walk away with a new framework for understanding their own spiritual awakening, practical tools for navigating life transitions, and permission to embrace their authentic journey — no matter how messy or unconventional. They'll discover that their deepest wounds can become their greatest gifts, and that true transformation happens when we stop fixing ourselves and start remembering who we really are. (Open to having "Live Callers").
